- Frontend Development
- Backend Development
- Database Management
- Version Control & Collaboration
- DevOps & Deployment
- API Integration & Third-Party Services
- Testing & Debugging
- Security Best Practices
- Problem-Solving & System Design

PROFILE

I'm a Full Stack Developer with 6 years of experience building web applications for travel and hospitality startups. I've worked extensively with file processing systems, document management platforms, and booking workflows using React, Node.js, PostgreSQL, and AWS. I thrive in small startup teams where fast iteration and direct collaboration drive results.

WORK EXPERIENCE

Senior Full Stack Developer March 2024 – June 2026
GridTech Solutions Inc.

- Built and maintained booking platforms and file processing systems, including PDF generation, image optimization, and secure file upload functionality.
- Developed backend APIs using Node.js and Express to support booking operations, travel itineraries, and customer-facing services.
- Improved data processing performance for PostgreSQL-based applications handling large customer and booking datasets.
- Collaborated with cross-functional teams to deliver scalable solutions and enhance system reliability.
- Mentored junior developers and participated in code reviews to promote engineering best practices.

Full Stack Developer July 2021 – March 2024
Horizon Digital Outsourcing

- Developed cloud-based document verification features utilizing AWS S3 for secure storage and content delivery.
- Built and customized WordPress and WooCommerce solutions for hospitality and tourism clients.
- Designed and integrated RESTful APIs to connect web applications with external services and business systems.
- Implemented modern frontend features using React, improving usability and overall user experience.
- Worked closely with designers and stakeholders in an agile environment to deliver business requirements efficiently.

Junior Full Stack Developer June 2020 – July 2021
Phoenix Tech Corp.

- Developed responsive web interfaces using React and TypeScript for management and booking platforms.
- Built and customized WordPress websites, including landing pages, contact forms, and content management features.
- Assisted in implementing backend functionality such as booking systems, PDF generation, and email automation.
- Participated in application testing, debugging, and deployment activities to ensure software quality.
- Collaborated with team members in development workflows using Git and containerized environments.

PORTFOLIO

SHOPIFY

EM5

This Shopify store is built with a custom Liquid theme optimized for fast performance, clean UI, and a fully responsive design. It includes advanced eCommerce features like automated upsells, product bundles, smart search, streamlined checkout, and secure payment integrations. Marketing automation is powered through email/SMS flows, abandoned cart recovery, analytics tracking, and app-based automation tools. The site also uses SEO-friendly structure, compressed media, and lightweight scripts for high-speed performance and improved conversions.
